

Olympiah Otieno

Full-Time Student

Phone +254745136634

E-mail anikaolympiah@gmail.com

I am a full-time student at the University of JKUAT who is very much an enthusiast of Data Science as a field. I am familiar with data visualizations using Power BI as well as querying data using SQL. Furthermore, I have experience doing frontend development using React and React Native and I am familiar with the Google cloud console. Additionally, my abilities extend to collaboration and teamwork with proficiency in problem-solving. I believe that data is going to change the world of technology in the future and most if not all industries will be in need of data scientists. I hope to use the technical skills that I have gained in to work on projects in teams or as an individual not only to gain knowledge but also create a stepping stone for me in this field.

IBM SPSS	<div><div></div><div></div><div></div><div></div><div></div></div> <div>Very Good</div>

Work Experience

Internal Attachment at JKUAT - January to March 2022

- My main focus during this attachment was on Networking, this entailed Routing and Cabling.

Data Analysis Industry Training – Feb to March 2023

- Learnt and practiced data analysis techniques such as effect size and power analysis, statistical T test, determining normality etc.
- I worked in a team of four on a Cancer Dataset and analyzed the data to gain insights. Lastly wrote a report to summarize.

Projects

EPL Data Visualization (English Premier League)

Project

This is a simple project I did to enhance my data analysis skills with Microsoft Power BI. I used the EPL 2021/22 dataset. I have broken down team statistics and created interactive dashboards for visualization.

This is the Power BI web link:

https://app.powerbi.com/links/whC3KMFRcg?ctid=ef8cc863-2140-41be-b7c5-436495915dbe&pbi_source=linkShare&bookmarkGuid=b6dd514b-cf2e-4cc4-b0e5-7cbd99a1210b

Image Classification Flower Dataset

Project

This was my 2nd Image Classification project in the AI nanodegree. I built a deep learning model that could predict the type of flower species. I incorporated Transfer Learning to increase the accuracy of the model, more precisely vgg16_bn.

Below is a link to the notebook:

LOAN PREDICTION

Project

This is a machine learning project for loan prediction based on the customer behavior. I trained the data on various models but chose the best performing one. It uses machine learning algorithms to predict whether a person is worthy of receiving a loan.

notebook link: https://colab.research.google.com/drive/1xduAS-HmOlboKm5_mRZdKvOqN0WJzdNp?usp=sharing

RemedMobile App

Project

remeD is a mobile app whose main objective is to reduce the in-person consultations of patients with chronic diseases and their doctors. We used React Native and expo to build the application. I was responsible for building the landing page, the login/sign page, adding animation features, PayPal react native for iOS device and publishing to the expo app store.

Education

2019-09 - 2023-12

Bachelor of Science: Computer Science

Jomo Kenyatta University of Agriculture And Technology - Nairobi, Kenya

Programming Languages

React JS

Very Good

React Native

Good

SQL

Good

Python

Good

HTML/CSS

Good

Languages

English

Excellent

French - A2

Average

Courses

Pre-qualified for AWS Machine Learning Fundamentals Nanodegree - present

Certifications

2022-11

AI Programming with Python, issued by Udacity

<https://confirm.udacity.com/F9DAPGE7>

Also qualified for the AWS docuseries. Link is below:

https://www.linkedin.com/posts/amazon-web-services_aws-ai-ml-scholarship-program-activity-7063974999325323265-ZRLx/?utm_source=share&utm_medium=member_desktop

2023- 03

Google Cloud Associate Developers Program

<https://acrobat.adobe.com/link/review?uri=urn:aaid:scds:US:7630fbf3-5927-3730-ad74-59a3949909f5>

2023-03

Data Analysis Industry training

<https://acrobat.adobe.com/link/review?uri=urn:aaid:scds:US:3007f906-f9f1-4c87-a2ff-4e3ed8729002>

Qualities

Curious, Team- Oriented personality, Passionate, Good communication, self-driven.
